Violation of this can result in confiscation of the above puppy.
- The Buyer agrees to provide a life-long commitment, comfortable environment, prompt medical attention, proper grooming and responsible care. This includes keeping the puppy/dog parasite free and up to date with vaccinations, proper nutrition, which consists of a good quality premium kibble given at regular intervals, and fresh water available at all times. The Buyer promises to provide a safe environment for the dog, and never allow the dog to roam freely without proper fencing or supervision. Buyer agrees to keep the puppy slim throughout pup's normal growth period (2 years). The Breeder can offer no further guarantees once the care of the puppy is no longer under Breeder's control.
- Buyer agrees to socialize puppy throughout its lifetime. An obedience class is highly recommended between 4-6 months of age.
- Buyer agrees to notify breeder of any change of address and/or telephone number during life of puppy.
- **UNDER NO CIRCUMSTANCES IS A RAINSHADOW PUPPY TO GO TO A SHELTER OR RESCUE!** If Buyer cannot keep the puppy, the puppy must be returned to the Seller unless a written agreement is signed by the Seller stating that the Buyer can sell the puppy to a third party. If abuse/neglect is suspected the Seller reserves the right to order the puppy to be seen by a veterinarian of Seller's choice. Seller will pay for the office visit and examination only. Any medications, vaccinations, or other costs are the responsibility of the Buyer. If abuse/neglect is confirmed, the Buyer relinquishes all rights to the puppy and the puppy automatically becomes the property of the Seller. The Seller is under no obligation to pay the Buyer for the puppy should abuse or neglect be confirmed. Buyer will be responsible for the fees associated with transferring registration to Seller's name.

- Buyer agrees to have above mentioned puppy’s hips screened for hip dysplasia after 24 months of age. If the dog is female and intact, then Buyer agrees not to have x-rays taken while she is in or near a heat cycle. This is a requirement even if the dog is not going to be used as breeding stock. Hip dysplasia is becoming more common in large breed dogs and by screening all of our puppies, we are better able to track genetic inheritance patterns. Buyer can use either PennHip or OFA. Results must be submitted to the Seller.
- Buyer agrees to wait until puppy reaches 18 months of age before a decision is made about spay/neuter. We find that 18 months allows the puppy to reach its maximum growth potential and for all growth plates and joints to be secure and healthy and done developing. After 18 months, the Buyer can decide to spay or neuter at their own discretion. However, if you think you have an exceptional Drent, then you might want to consider contributing to gene pool :)
